

SCANOSS SET UP

Your API key can be configured for all our client applications. All you need is the Base URL and [YOUR_KEY].

To use our Service with the **Python** or **JavaScript CLIs**, simply install the CLI of your choice and add the arguments --**apiurl** and --**key** to the scan command:

Python CLI

scanoss-py scan <input_folder> --apiurl

https://api.scanoss.com/scan/direct --key [YOUR_KEY]

JavaScript CLI

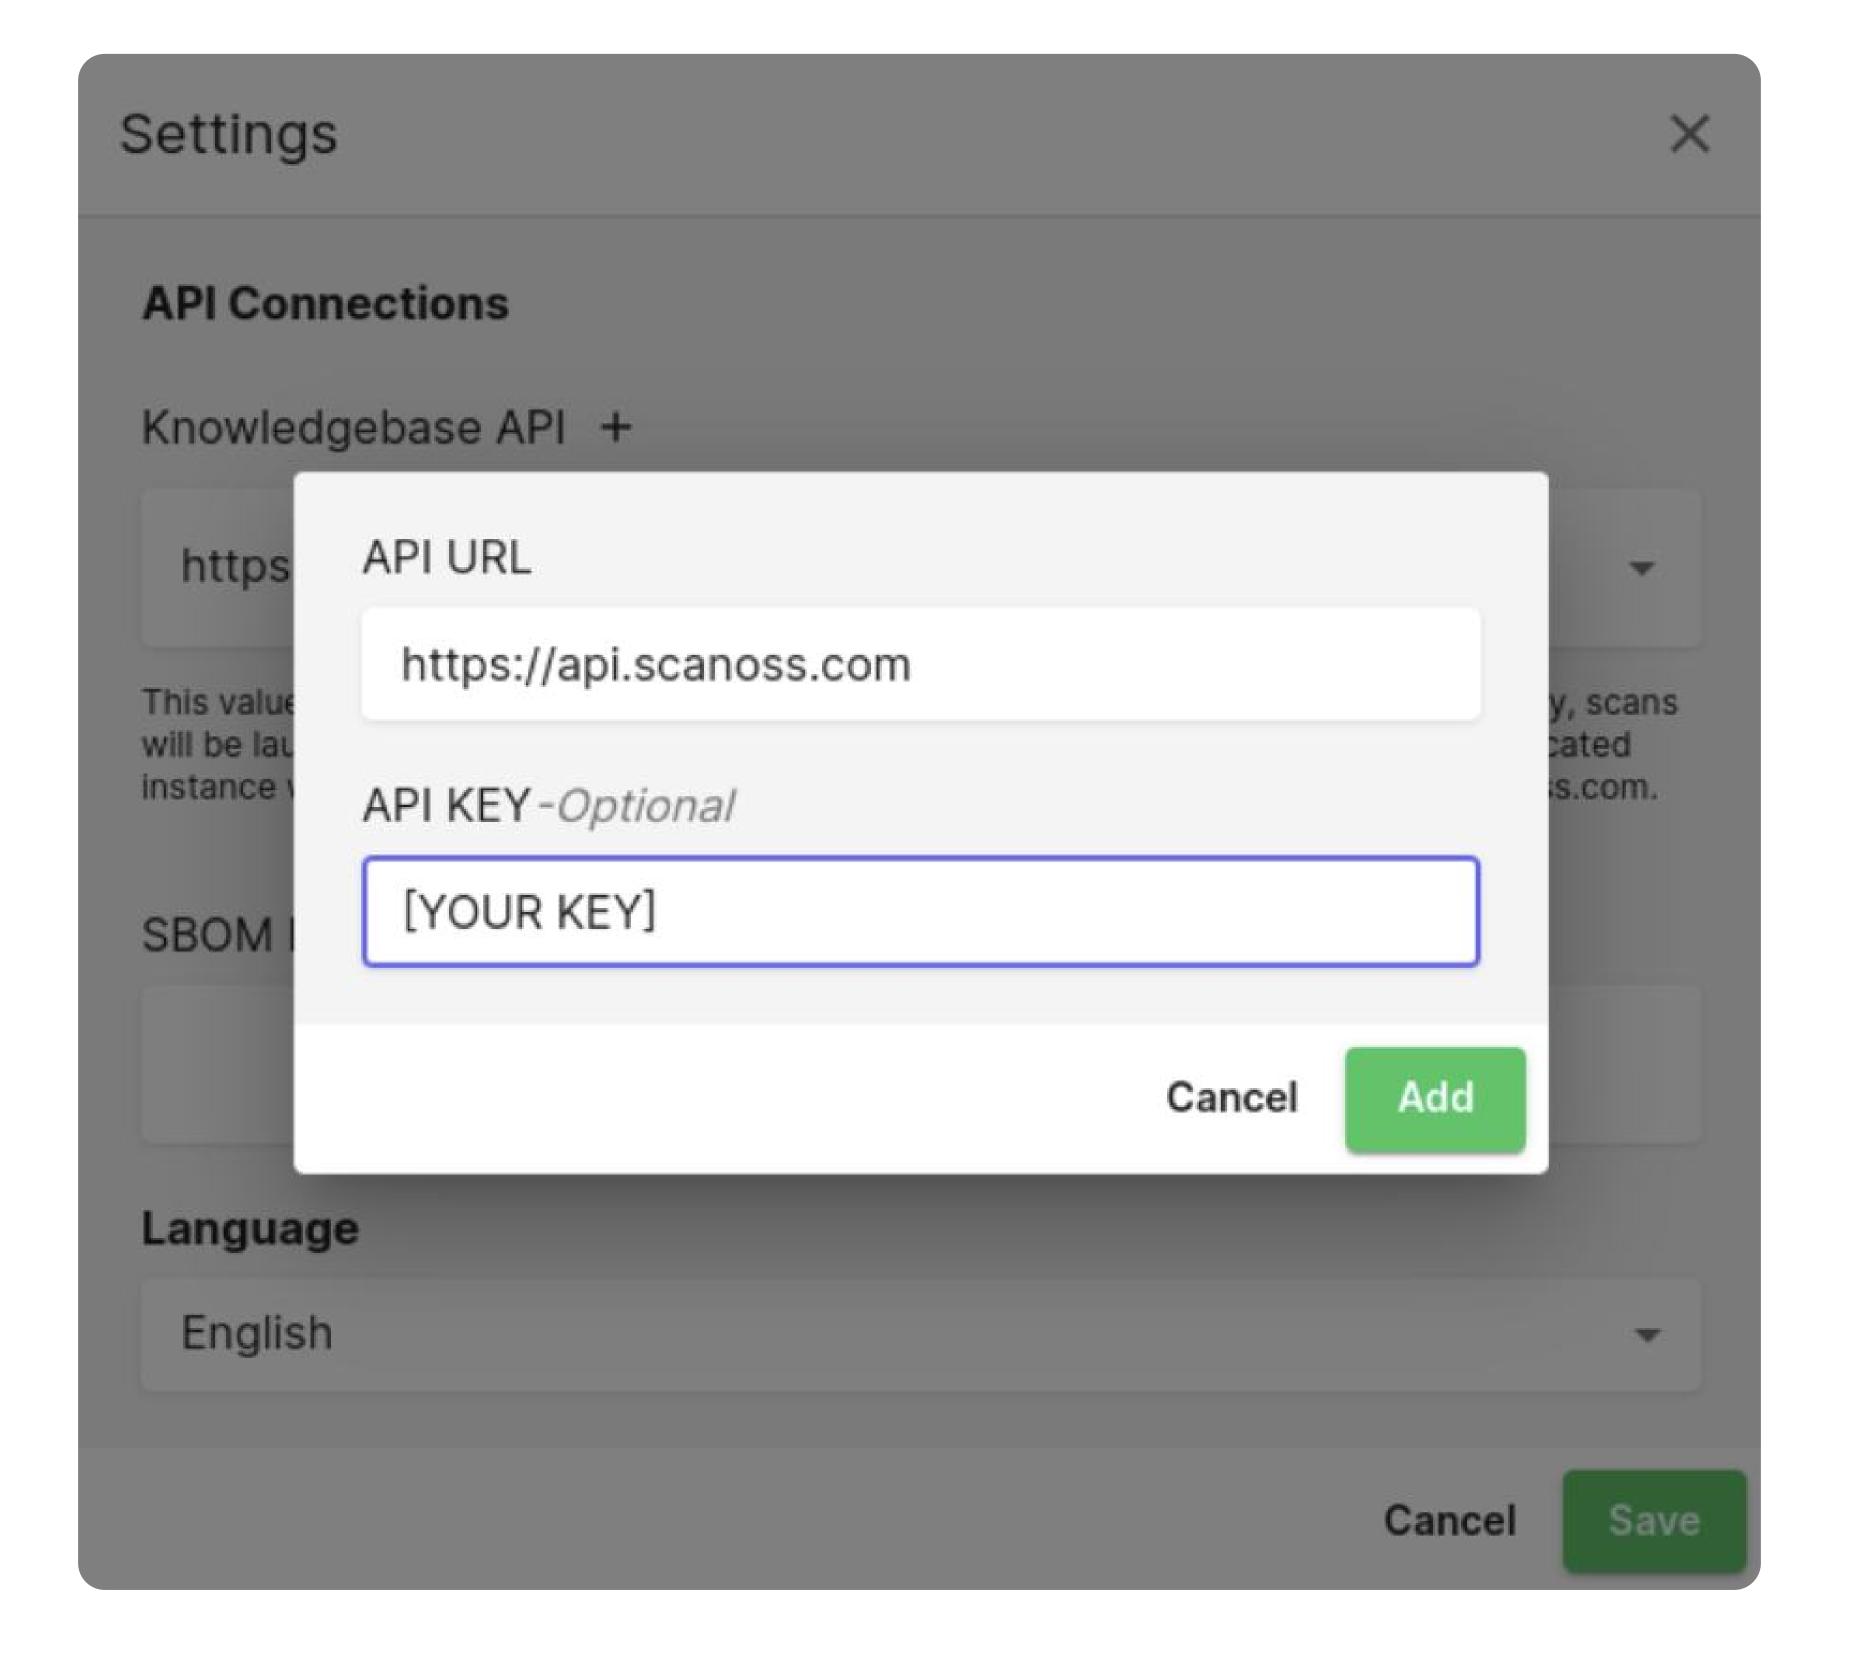

scanoss-js scan <input_folder> --apiurl

https://api.scanoss.com/scan/direct --key [YOUR_KEY]

Audit Workbench

The Audit Workbench can be easily configured by going to File \rightarrow Settings and creating a new Knowledge Base API Key by clicking the '+' button. In the new form, enter your credentials.

Audit Workbench API Key Setup

After adding your new KB API connection, your next scans will run against the Service.

If you have any questions, make sure to visit our Customer Service Portal at https://support.scanoss.com or email us at: support@scanoss.com.
